ENERGY ON THE MOVE

Building Value. Today and Tomorrow.

www.hess.com

Hess has operated in Equatorial Guinea since 2001 and in partnership with Tullow Oil and GEPetrol, we have oil and gas production at Okume Complex and Ceiba Field. With an industry-leading nationalization program, we are focused on growing the economy and building opportunities for local companies. We're working with the government of EG on PRODEGE by building schools and strengthening the primary education system. We are creating value and making a difference in Equatorial Guinea...now and for the future.
